Rajat Jain

Senior Software Engineer | Full-Stack, AI-Powered Applications, React.js

Jaipur, India | 9680593198 | rajatjain0408@gmail.com | linkedin.com/in/rajat-jain-756a05197

SUMMARY

Senior Software Engineer with 9+ years of frontend experience, specializing in AI-powered applications and full-stack development with React.js (React JS), TypeScript and JavaScript, supported by Node.js, Python and REST and GraphQL APIs. Applies Generative AI, LLMs, prompt engineering, Retrieval-Augmented Generation (RAG), embeddings and vector search (FAISS, Ollama). Skilled in reusable, accessible (WCAG) UI components and design systems, CI/CD and cloud deployment, secure coding practices and code reviews. Works closely with product managers, designers and backend engineers.

SKILLS

Frontend: React.js (React JS), Next.js, Svelte, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, Design Systems, WCAG accessibility
Programming languages: JavaScript (ES6+), TypeScript, Python, Node.js; hands-on C#, Java, C++
Backend and APIs: Node.js, Python, REST API integration, GraphQL
Generative AI: Generative AI, LLMs, prompt engineering, RAG, AI API integration, embeddings, vector search, FAISS, Ollama
Cloud, DevOps and security: Cloud deployment, CI/CD, secure coding practices (authentication, input validation, security reviews), code reviews
Tools and testing: Jest, Webpack, Vite, Git, GitHub, Figma, Jira

EXPERIENCE

Senior AI Frontend Engineer

Nagarro Private Limited, Jaipur | Mar 2024 - Present

- Built 10+ React.js and TypeScript screens for an AI-powered application using LLMs and Ollama, with reusable, accessible components that improved frontend maintainability.
- Developed backend APIs in Node.js and Python, including RAG retrieval with FAISS vector search, to support the AI application.
- Deployed applications and used cloud services and CI/CD pipelines to ship releases.
- Applied secure coding practices, including authentication, input validation and security reviews.
- Collaborated day to day with product managers, designers and backend engineers to deliver features.
- Performed code reviews and upheld code-quality standards across the team's work.

Front End Developer

Wipro Private Limited, Jaipur | Mar 2022 - Mar 2024

- Built 20+ reusable React.js components using JavaScript and TypeScript, improving code reusability.
- Integrated 15+ REST API endpoints, supporting scalable web application development.
- Worked with backend engineers, product managers and designers to turn requirements and designs into working features.
- Performed code reviews to maintain code quality.

Front End Developer

Atcs, Jaipur | Jan 2021 - Mar 2022

- Developed 15+ reusable React.js and TypeScript components across web applications.
- Resolved cross-browser UI issues, improving interface consistency and maintainability.

Front End Developer

Webcontxt, Jaipur | Aug 2020 - Dec 2020

- Developed interactive React.js components in JavaScript, delivering responsive and consistent interfaces.

Front End Developer

Anktech Software Private Limited, Jaipur | Apr 2017 - Jul 2020

- Developed and maintained React.js interfaces in JavaScript for web applications.
- Resolved UI issues to improve responsiveness and user experience.

EDUCATION

Bachelor of Engineering, Electrical, Electronics and Communications Engineering
Birla Institute of Technology, Mesra | Aug 2016
